About Me

Experienced software engineer with a passion for developing innovative programs that expedite the efficiency and effectiveness of organizational success.

Projects

Project One

A web application that allows users to track their tasks using React and Node.js.

Project Two

A mobile app built with React Native and Firebase that helps users manage their finances.

Experience

Tech Company

Senior Software Engineer

01-01-2021 - Present

Lead a team of 5 engineers to develop scalable web applications using React. Implemented new features and optimized existing ones using Node.js and MongoDB.

Another Tech Company
Software Engineer

01-01-2021 - 01-01-2021

Working at NatWest as a front end engineer focusing mostly on a corporate banking product called Bankline. Working as part of a scrum team consisting of 5 developers, 2 testers and a PO/BA. The front end is a React app that talks to an API built using a collection of Java microservices. I have spent time working in multiple parts of the stack including helping to define our front end architecture to follow best practices to implementing PDF and CSV export in a microservice.

Academic record

University of Technology
Bachelor of Science in Computer Science

01-01-2021 - 01-01-2021

Studied computer science and software engineering. Completed courses in algorithms, data structures, software design, and database management.

After hours

I enjoy playing guitar and reading science fiction novels.
